

Data Day 2026: From Data to Action

Join the Kansas Chapter of the LHD Academy of Science for Data Day 2026, an interactive learning experience focused on building confidence and practical skills in using data to inform decisions, tell meaningful stories, and engage communities.

This year's event will feature an interactive session led by the Kansas Health Institute, including a hands-on data walk and practical strategies for sharing data with different audiences. The day will also include a Survey School session led by Dr. Sarah Jolley with the WSU Community Engagement Institute focusing on knowing your audience.

Event Details

Wednesday, June 17, 2026

9:00 am - 3:00 pm

The Pavilion at Madison Avenue Central Park (618 N Derby Ave, Derby, Ks)

Cost & Support

- **Free to attend**
- Morning snack and lunch provided
- Travel stipends are available to help offset participation costs

Who Should Attend?

Kansas state or local health department staff working with surveys, data collection or analysis, evaluation, community health assessments, reporting, or quality improvement.

Throughout the day, participants will:

- Strengthen skills in identifying and understanding their audience
- Explore strategies for communicating data clearly and effectively
- Practice discussing data and responding to real-world questions
- Learn how to move from data collection to meaningful insight and action
